

KHALID KHAN

AI Software Engineer | ML Engineer

+92 3708218757 | khalidkhankakar2468@gmail.com | khalidkakar.pro | github.com/khalidkhankakar | linkedin/khalid-khan-kakar1/

SUMMARY

AI and ML Engineer with experience building production ready Machine Learning systems and modern web application skilled in **Python, Pytorch, Sk-learn FastAPI, Next.js, Typescript** and **MYSQL**. Experienced in developing AI powered solutions and scalable web platforms. Passionate about designing intelligent system that combine ML with high quality software engineering

EXPERIENCE

ML Eng. Intern

June, 2026 - Present

[FlyRank.ai](#)

Remote

- Improved data preprocessing workflows through feature engineering and automated validation
- Developed REST APIs with FastAPI for ML models in production.
- Working every week on new concepts of Machine Learning and making hands on practical task.

WEB Dev. Intern

June, 2025 - Sept, 2025

Mountain View Tech Park

Onsite

- Build responsive web applications using React.js and Typescript
- Developed reusable UI components with Tailwind CSS.
- Integrated REST APIs and optimized application performance.

PROJECTS

PulseAI

January, 2026 - June, 2026

Next.js, FastAPI, TypeScript, Sk-Learn, BetterAuth

[link & code](#)

- Built an AI powered healthcare platform for disease prediction and medical assistance.
- Trained ML models for Heart, Diabetes, Liver and Stroke datasets
- Developed FastAPI services to deploy ML model for real-time inference.
- Integrated multiple LLM providers to deliver AI powered health guidance such as (Qwen, Gemini, GPT OSS)
- Built a responsive dashboard using Next.js and TypeScript secured by Better Auth

VisionBoard

May, 2024- Present

React.js, Next.js, LiveBlocks, DrizzleORM, Clerk, PostgreSQL (Neon DB)

[link & code](#)

- Developed a real-time collaborative whiteboard application supporting simultaneous multi-user editing.
- Implemented interactive drawing tools including freehand pen, shapes (rectangle, circle), eraser, undo and redo.
- Built real-time synchronization using Liveblocks enabling low-latency collaboration across connected users.
- User can make organizations and invites the other people by their email through clerk.

ShiftTab

August, 2026 - Present

React.js, Hono, AI SDK, TypeScript, OpenTUI

[link & code](#)

- Building ShiftTab, a **terminal-native** AI coding agent inspired by **Codex** and **Claude Code**.
- Implemented streaming AI chat, model selection and slash commands for smooth **CLI** workflows.
- Added file-system tools for reading, writing, searching, creating and managing project files.
- Expanding with agentic coding workflows tool execution, project context and multi-model support.
- Still working on new features such as **auth**, preserve chat in database, more tool calls, **MCPs** and more.

EDUCATION

BS in Data Science

Sept, 2022 - June 2026

GC University Faisalabad

ML, Statistics, Programming

CGPA: 3.1 / 4

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, SQL, HTML/CSS

Frameworks: React.js, Next.js, Node.js, FastAPI,

Developer Tools: Git&Github, VSCode, Opencode, Docker, Github Actions

Libraries: Pytorch, Pandas, Numpy, Sk-learn, Shadcn/UI

Skills: Full-stack, ML Eng., RNN, CNN, Transformers, MCP

ACHIEVEMENT

FireGird secured 5th place in the [JavaScript Mastery Hackathon](#), earning free access to the Dev Accelerator course as a recognition of the project's performance.
