Summary

Final-year Data Science and full-stack developer with hands-on experience building real-time, collaborative web applications. Proficient in Next.js, React, Node.js, and PostgreSQL, with a strong focus on clean architecture and modern tooling. Actively exploring machine learning and deep learning alongside full-stack development.

Skills

- **Languages:** JavaScript | TypeScript | Python | MSSQL | NoSQL | HTML | CSS
- **Frameworks:** ReactJS | NextJS | MongoDB | Node | Express | HonoJS | Redux Toolkit | Drizzle ORM | Tailwind CSS | BetterAuth
- **Tools:** Vercel | Git & GitHub | Docker
- **Skills & Proficiencies:** Frontend | Backend | Full-Stack | English, Urdu, Pashto – *All professional proficiency or above*

Experience

Web Developer Intern	<u>Mountain View Tech Park</u>	<i>Quetta, Pakistan</i>	05/2025 - 08/2026
• Analyzed dependencies using Webpack Analyzer to optimize performance. • Organized code files and folder structure for improved clarity and maintainability. • Practiced HTML, CSS, and JavaScript tasks to strengthen skills and enhance proficiency. • Continuous Deployment, code reviews, unit testing.			

Education

Bachelor of Science	<u>GC University Faisalabad</u>	<i>Faisalabad, Pakistan</i>	09/2022 - 06/2026
• Major in Computer Science, Math and Statistics Relevant coursework: Data Structures & Algorithms, Databases, Statistics Currently exploring: Machine Learning, Deep Learning, PyTorch,			

Projects

VISIONBOARD	<u>LINK & CODE</u>	2025
• Vision Board is a real-time collaborative drawing application that allows organization-based teams to brainstorm and ideas on a shared canvas, like Figma. • Offers mobile-supported, real-time drawing tools (ellipses, rectangles, lines, and sticky notes) with robust editor actions like selecting, resizing, translating, moving, undo, and redo. • Built on the frontend with Next.js 15, React 19, Tailwind CSS, and ShadcnUI, paired with a backend powered by Hono.js, Liveblocks for live syncing, Clerk for security, and Neon PostgreSQL via Drizzle ORM.		

FIREGRID	<u>LINK & CODE</u>	2024
• Fire Grid is a real-time, collaborative task management app featuring live cursor tracking, drag-and-drop Kanban boards, and customizable, color-coded task cards. • Includes an integrated AI assistant (powered by Gemini/LangChain), board template forking, advanced fuzzy search, and comprehensive filtering options. • Built with Next.js, React, Tailwind, and ShadCNUi, utilizing Liveblocks for real-time syncing, Clerk for authentication, and Neon PostgreSQL (with Drizzle ORM) for data management.		

DEVPOST	<u>LINK & CODE</u>	2024
• A fully responsive Dev Community clone for developers to write, publish, and manage articles. • Includes a rich text editor (TinyMCE) for drafting content, advanced search filtering, and complete profile management. • Powered by Next.js, React, and Tailwind CSS, with MongoDB for data storage and Clerk for secure authentication.
