SUMMARY

AI Engineer and **Full Stack Developer** experienced in building production-ready machine learning systems and modern web applications using **Python**, **PyTorch**, **scikit-learn**, **FastAPI**, **Next.js**, and **TypeScript**. Skilled at turning machine learning ideas into reliable, practical products by combining strong software engineering with AI.

EXPERIENCE

ML Engineer Intern

Jun 2026 - Present

[FlyRank.ai](https://flyrank.ai)

Remote

- Improved data preprocessing workflows through feature engineering and automated validation.
- Developed 4+ REST APIs with FastAPI serving ML models in production, handling requests with <200ms latency.
- Continuously built ML fundamentals through weekly hands-on practice, applying new concepts directly to production work.

WEB Developer Intern

Jun 2025 - Sep 2025

Mountain View Tech Park

Onsite

- Designed a scalable library of reusable UI components using Tailwind CSS, accelerating frontend development cycles.
- Built dynamic, fully responsive web applications with React.js and TypeScript, enhancing cross-device compatibility and increasing user retention.
- Integrated REST APIs and optimized application performance, reducing page load by times by 10%.

PROJECTS

PulseAI

Jan 2026 - Jun 2026

Next.js, FastAPI, TypeScript, Sk-Learn, BetterAuth

[link & code](#)

- Built an AI-powered healthcare platform for heart disease, diabetes, liver disease, and stroke prediction, training and evaluating 4 ML classification models.
- Served real-time predictions through FastAPI and integrated Qwen, Gemini, and GPT-OSS LLMs to deliver AI-powered health guidance.
- Developed a responsive Next.js + TypeScript dashboard secured with Better Auth.

VisionBoard

May 2024- Present

React.js, Next.js, LiveBlocks, DrizzleORM, Clerk, PostgreSQL (Neon DB)

[link & code](#)

- Built a real-time collaborative whiteboard supporting simultaneous multi-user editing with low-latency synchronization via Liveblocks.
- Implemented freehand pen, shapes, eraser, undo/redo with real-time sync.
- Built organization management and email-based invitations using Clerk, backed by PostgreSQL (Neon) and Drizzle ORM.

ShiftTab

Aug 2026 - Present

React.js, Hono, AI SDK, TypeScript, OpenTUI

[link & code](#)

- Building a terminal-native AI coding agent with streaming AI chat, model selection, and slash commands for CLI workflows.
- Implemented file-system tools for reading, writing, searching, and managing project files directly from the terminal.
- Expanding agentic workflows with tool execution, project context, multi-model support, MCP (Model Context Protocol), authentication, and persistent chat history.

EDUCATION

BS in Data Science

Sep 2022 - Jun 2026

GC University Faisalabad

ML, Statistics, Programming

CGPA: 3.25 / 4

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, MySQL, HTML/CSS

Frameworks / Libraries: React.js, Next.js, Node.js, FastAPI, PyTorch, Pandas, NumPy, Scikit-learn, shadcn/ui

Developer Tools: Git & GitHub, VSCode, OpenCode, Docker, GitHub Actions

Skills: Full-stack, Machine Learning Engineering, RNN, CNN, Transformers, MCP

AWARDS & ACHIEVEMENTS

FireGrid secured 5th place in the **JavaScript Mastery Hackathon**, earning free access to the Dev Accelerator course as a recognition of the project's performance.
